

ADVENTURE TRAILER EUROPE ATS

Our ATS trailer handmade in the Netherlands. It is short and rugged. Galvanized and aluminium, chequerplate fenders, optional boxes and top. All painted with U-Pol Raptor or powdercoated in black to give it that awesome aggressive look.

Designed especially for the use with a rooftopent. Weighing only 350 kg in the base model. It has a smashing 1000 litres of storage capacity, With a braked axle, independent suspension, aluminium 16 rims and Bfgoodrich 265/75R16 All Terrain Ko2 Tires. A 550 kg rated jockey wheel is standard, making the use of supportlegs in the front obsolete.

It can be equipped with optional boxes, to be used for more storage or as a kitchen worktop. There is a roofrack available and supports for an awning. Even a swing away spare wheel carrier on the back with a full-size spare can be chosen. Supportlegs can be added either straight or folded.

Of course, we can support you with a top range rooftopent and awning from Offroadcamp (offroadcamp.info) with free installation or you can bring you own.

This small trailer will give you the freedom to travel on and offroad, setup camp and explore quick and easy without the hassle of breaking up camp or the risk of damaging the tent whilst offroading. No more taking the rooftopent of in winter, more then enough storageroom on holiday. Easy weekend trip setup.

It is the ultimate get away toy for adventurous couples and singles. But also, the best extension to your offroadcamper for the kids.
